

**Collecting**

Robert Fiechter had a collection of over 2000 models. Then he wanted to sell them all and give up the hobby. Fortunately, he was not able to part with some of his favorite pieces ...

Siku is very well known for high quality die cast model vehicles. That the letters “ku” in the name stand for “Kunststoff” (plastic) is not known to most. Robert Bretscher illuminates the history and shows remarkable models from that time ...

**Models**

Carsten Bengs has been waxing eloquently about the quality of the new Liebherr LTM 1400 from YCC. No other currently available model offers so many refinements ...

With the Combimax system, the Belgian lowboy Faymonville offers a system with almost limitless possibilities. From Conrad now comes this very extensive set of that offers all the possibilities of the original ...

**Current**

Modification specialist Urs Peyer is also good at recycling left overs. The model of the Liebherr PR 714 was made from parts left over from two other projects ...

The firm of Langmesser Modellwelt is a producer of accessories for the model train market. Among its offerings are some excellently detailed plaster castings of concrete tile. We show you how to make a super yard for your vehicles ...
