Collecting

The collecting virus infected Alexander Toengi twenty years ago. Since then, he has amassed a particularly nice collection that focusses on models used in civic engineering ...

A further piece of eye candy from Albert Schmid is a model of the Menck DN2 from his personal collection. Peter Keim built this brass model of superlative quality and detailing in a very limited series ...

Models

Bymo is making a comeback with a model of a real classic machine, the huge Michigan 475B. We take a closer look at the brand new wheeled loader ...

It is hardly possible to have a more charming juxtaposition: the huge Wirtgen WR 240 (see title page) and the small W 35DC were released by NZG at the same time. The cold recycler and the surface stabilizer, and the small cold grinder ...

Current

The Liebherr LR1600/2 from NZG and Herpa as well the R9800 were the greatest sensations at this year's Toy Fair, but not the only ones ...

Models of demolition machines are booming at the moment and if you want to show them off properly you need a diorama. Markus Lindner explains what to take into consideration when simulating demolition scenes ...
