Collecting

Needing money, Hugo Oschwald got involved in construction machines ,won a «Trax Race» and began to collect miniature construction machines. The stuff in his display cabinets is more than just nice to look at.

Albert Schmid took one of his eye candy pieces out of his display cabinet. After careful researching, not sparing time or effort, he is able to report some fascinating details about the Clark Michigan 125B by Conrad.

Models

Able to transport 50 Tonnes, the Sandvik TH550 is one of the largest underground dump trucks in the world. Equally large and appealing is the new model from Conrad.

Norscot presents a new model with the Caterpillar 793F, the third in a series of large mining dump trucks. We take a close look at the model with the X standard dumping bin and report on our findings.

News

Urs Peyer looks at the Caterpillar 793F in detail. He looks expertly at the development of the F series with respect to the large mining dump trucks of today.

California was the Mecca of scrapers. Our traveling reporter in the US, Urs Peyer, reminisces about the «golden scraper age». Some spectacular pictures are included, of course.
