Collecting

Ernst Mumenthaler was a passionate truck driver. Alongside the many cargo trucks in his collection are numerous heavy duty transport rigs loaded with construction machines ...

Very rarely has a model undergone as many changes during the time of its production as the Caterpillar 621 with the Athey rear dumper from NZG has. Albert Schmid researched the model with the intense attention to detail that he is known for ...

Models

A model of this weight class has not been available until now. What you can expect from the new NZG model of the R 936 in 1:50 scale is revealed in our title story ...

The Schmitz Cargobull S.KI Light dumping bin trailer is a real light weight at 4.5t. In contrast, the Conrad model is heavy duty and solidly made from metal. Want to know what else to look for? Read our report ...

Breaking news

Paris hosted the Intermat in April. Traditionally, at such construction machine expositions, new models are introduced: we look at a few of them ...

Also in Paris, Liebherr presented its new line up of tracked excavators. Urs Peyer posed some questions and lets us know what to expect from the three new excavators, the R 936 Litronic, R 946 Litronic and the R 950 SME Litronic ...
