Collecting

Felipe de Moraes Russo has a collection of old earth-moving machinery. The Brazilian collector used his talents to advantage in building his own models when he was strapped for cash ...

Albert Schmid introduces a classic model among dump trucks, the Euclid R-55. A closer look at this limited series model from Smith provides a feast for the eyes. Even today it is a model sought after by collectors ...

Models

The first series of the new Liebherr R 9800, first shown at the Nuremberg Toy Fair, has been delivered. This gigantic excavator is the star of our front page story ...

With its articulated dumper, the DA 40, Doosan in Munich surprised us with a new collector's model. A generally unknown maker makes it. We took the time to have a closer look ...

Current

Never before were there so many new models on display as on this year's Bauma. We were on the spot and tried to get overviews about all the offerings ...

As salt accentuates flavour in a soup, so details flavour a diorama; the little details bring the diorama to life, says Markus Lindner. Where to find and how to scratch build them, is the content of this installment on how to build a Diorama ...
