Collecting

From the moment he witnessed the erecting and dismantling of cranes in the harbour at Nuremberg, Michael Compensis was fascinated. Cranes that are ready to travel are the models he collects ...

From 1968 through to 2004, NZG offered the 1:24 model of the Caterpillar 941 in various versions. Thomas Wilkes shines a light on to the history of the tracked loader and illuminates all the special details of this model ...

Models

With the Liebherr R 922 Litronic, Conrad presents an excavator model of the prevalent 20 t class. We show you what to expect from this excavator model ...

With the AMK 71-52 from Gottwald, Himobo has dared to bring out a model that will generate great interest with the collecting community. Carsten Bengs looks at the details of the 2 Kg model crane ...

Current

We are starting a leisurely look at excavator attachment tools. The first to be featured are the products of Gaz Evans from Great Britain ...

Diorama specialist Markus Lindner delves into a new theme. In his new series he looks at building a road diorama. In the first installment he describes how to build a country road that will create a first class setting for your models ...
