Collecting

Mauro Zecchetto is a Saurer fan. And, as a police officer, he often escorts heavy duty transports. This is reflected in his extensive collection, a must see in 1:87 scale ...

A great deal of digging was required by Albert Schmid to get the information for a Tamrock drilling rig build by Conrad in the 80's. The resulting report is revealing ...

Models

The new Hitachi ZX 1000K from NZG in 1:50 scale is a very impressive model,. The model is available with 18 m jib or a 40 m height jib and boom combo that literally leaves you breathless ...

Once again WSI has pushed the frontiers of the die casting art with the model of the Faun Tadano HK70. The truck mounted crane has remarkable detail work and more; all is explained by Carsten Bongs ...

Current

We introduce Peter Veitch a modeller par excellence. The models leaving his work bench are among the finest, and all are made without plans ...

How the demolition trade has changed over the last thirty years is described by Urs Peyer using as examples the machines used over time for this purpose. The path taken from the demolition ball to the concrete scissors was not always a voluntary one ...
