## Collecting

There are only 25 models in Peter Gysi's collection because he builds all of them himself. His passion is for false works thus his dioramas are about bridges, modern and historical, during construction ...

After the war the Japanese became masters of copying successful designs, including tinfoil toys. The cable operated excavator with attached pile driver, a Hitachi prototype, shows their own inventiveness ...

## Models

The A918 Compact is the second excavator model from NZG this year. Both are from Liebherr. We drove a model of a new Excavator right under the magnifying glass ...

It was a surprise when, during their open house in mid-June, Liebherr unveiled the LTM 1750-9.1. And as a special treat, all customers were presented with a 1:87 scale model. One of the very first has found its way to our studio ...

## Current interest

The second part of the development history of large bulldozers begins in the middle of the 50s with a truly legendary machine and its successors ...

The third part of the series about building a diorama finally moves from the planning to the building stage in this issue. Our diorama specialist, Markus Lindner, shows us in detail how to achieve realistic results ...
