**Collecting**

That Gilbert Rossinelli does not like to rest and loves change is evident in his collection which undergoes constant changes. He was also a producer of foundation models ...

Off-road cranes are something special and are often used to maintain machinery in above-ground mining. Albert Schmid introduces the Gottwald G 45 and shows us from all angles, the corresponding model from HiMoBo ...

**Models**

The super Liebherr R 9800 model is now finally available as a backhoe version. We put the model under the microscope ...

With the Caterpillar 982M, Norscott shows that it is possible to make model updates correctly. The wheeled loader is not just a newly-lettered 980K, but a model with many new parts that is true to the original ...

**Current**

In the third part of his Diorama series about road construction, Markus Lindner takes us to a construction site: the country road from part I is gets a traffic circle ...

The Caterpillar 777 is one of the trucks in its class that has been produced in the greatest numbers of all. We introduce the new model from CCM and Urs Peyer illustrates the 40-year-long success story of the original machine ...
