Collecting

Some models are shown by the dozen in the display cases of Oliver Steck. For him less is more; he would rather have many of his favorite models than models that have little meaning for him ...

A huge piece of eye candy is the Terex Unit Rig MT 5500 from OHS, introduced by Albert Schmid. The model, made completely from scratch and detailed to the 'nth' degree, is made almost completely from brass ...

Models

First Gear is building the Komatsu DG 655-5 Grader, equipped with GPS in the quality that we expect from them. We took a close-up look at the model ...

In our series about attachments for excavator models, we introduce HF-models from Vienna. Fritz Hanisch relies to a great degree on the 3-D printing process and concentrates on attachments for cable-controlled excavators, but that's not all ...

Current

Michael Compensis, our specialist for the smaller scale of 1:87, has been waiting long in anticipation of the Liebherr LR1600/2 model from Herpa. He introduces the model ...

In the fourth and last part of the diorama series on modeling road construction sites, Markus Lindner shows us how construction sites are correctly secured, and of course, where to find the necessary accessory parts in 1:50 ...
